## EDUCATION

- Ph.D. **University of Pennsylvania, The Wharton School**, Philadelphia, Pennsylvania  
Management and Economics, 2009  
Disciplinary Cluster: Management  
Disciplinary Cluster: Health Care
- M.S. **University of Pennsylvania, The Wharton School**, Philadelphia, Pennsylvania  
Management, 2006
- MPH **University of Arizona**, College of Public Health  
**Arizona State University**, W.P. Carey School of Business, Tucson, Arizona  
Health Administration and Policy, 2003
- B.S. **Rutgers University**, New Brunswick, New Jersey  
Public Health, 2001
- B.A. **Rutgers University**, New Brunswick, New Jersey  
English Literature, 2001

## ACADEMIC LEADERSHIP

- 2024 - Present **Stern School of Business at NYU Abu Dhabi**  
Vice Dean of Programs
- 2023 - 2024 **Stern School of Business at NYU Abu Dhabi**  
Associate Dean of Programs
- 2021 - 2024 **New York University (NYU), Abu Dhabi**  
Program Head for Business, Organizations and Society

## ACADEMIC APPOINTMENTS

- 2023 - Present **Stern School of Business at Abu Dhabi**  
Associate Professor of Management
- 2020 - 2024 **New York University (NYU), Abu Dhabi**  
Associate Professor of Social Research and Public Policy

## JEMIMA A. FRIMPONG

- 2021 - 2024 **New York University (NYU), Abu Dhabi**  
Associate Professor of Business, Organizations and Society
- 2018 - 2020 **Johns Hopkins University, Carey Business School**  
Associate Professor of Management and Organization
- 2016 - 2018 **Johns Hopkins University, Carey Business School**  
Assistant Professor of Management and Organization
- 2012 - 2016 **Columbia University, Mailman School of Public Health**  
Assistant Professor of Health Policy and Management
- 2009 - 2011 **Columbia University / Navrongo Health Research Centre (Ghana)**  
Assistant Professor of Population and Family Health

### OTHER AFFILIATIONS

## **GRANTS AND FUNDING**

### **Pending Research Support**

**Title: PrEP for Practice Advancement to Reach Everyone: the PrEPARE study**

Agency: National Institute of Health - NIDA

Role: Co-Investigator (with Sabrina Assomou)

Amount Requested: \$2.5 million

#### **Summary:**

Persons who use drugs (PWUD) experience co-occurring human immunodeficiency virus (HIV) risks through injection drug use and sex. 1 Injection-related HIV infections have surged during the US overdose crisis. Although HIV pre-exposure prophylaxis (PrEP) is an evidence-based, highly effective HIV prevention measure, PrEP uptake is low among PWUD, especially for those identifying as Black or Latino. Addressing institutional level factors would tackle an important root cause of low PrEP uptake among PWUD and complement existing individual-level interventions. A critical need exists to develop and implement institutional interventions to increase PrEP uptake among Black and Latino PWUD who are disproportionately impacted by HIV. The main objective of the current proposal is to target institutional-level factors to improve PrEP uptake and adherence among Black and Latino PWUD. We will first use an implementation science mixed-methods design to amplify known

## JEMIMA A. FRIMPONG

institutional barriers and uncover novel barriers. We will then design, implement and evaluate an evidence-based intervention using practice coaching methods to address these barriers.

### **Title: “Feasibility and Acceptability of Low- Threshold Medications for Opioid Use Disorder and HIV Prevention in Federally Qualified Health Centers in the U.S.”**

Agency: National Institute of Health - NIDA

Role: Consultant (with Czarina Behrends; Bruce Schackman)

Amount Requested: \$2.5 million

#### Summary:

Rates of opioid overdose fatalities in the United States continue to rise stemming from increased fentanyl use alone and in combination with other substances. Reducing opioid overdose fatalities requires significant expansion in access to both evidence-based medications for opioid use disorder (MOUD) and harm reduction services. Identifying successful approaches that have been implemented in these settings can lay the groundwork for organizational interventions to improve uptake. The goals of this study are to better understand what components of low-threshold MOUD, harm reduction services, and HIV prevention services are being successfully implemented at opioid treatment programs (OTPs) and Federally Qualified Health Centers (FQHCs) in the US, and to develop and pilot test an implementation facilitation strategy to improve uptake and sustainment in these settings. This study will provide the first national data on the penetration of low-threshold MOUD and harm reduction practices into OTPs and FQHCs and be the first national pilot implementation facilitation study for expanding these approaches.

### **Title: “Texas Study of Country’s Health, Opportunities, Outlooks, and Lifestyles (SCHOOL) in Ghana”**

Agency: National Institute of Minority Health and Health Disparities - NIMHD

Role: Co-Investigator (with Daniel Howard)

Amount Requested: \$2.5 million

#### Summary:

The goal of the “Texas SCHOOL in Ghana” is to significantly increase the number of undergraduate and graduate students from diverse backgrounds and underrepresented groups who successfully complete baccalaureate and Ph.D. degrees in behavioral and social sciences research, and ultimately, increase the diversity of the behavioral and social sciences scientific workforce to improve minority health and reduce racial health disparities. This will be accomplished through a three-pronged support structure targeting high-achieving, diverse, underrepresented undergraduate and graduate students in areas pertaining to behavioral and social sciences research for an authentic international research experience; career mentoring and guidance; and, academic enhancements, skill development, and research training that will enhance the diversity of the behavioral and social sciences research workforce. Such research

## JEMIMA A. FRIMPONG

experiences will help prepare students to compete for positions in Ph.D.-level graduate and professional schools and for careers in behavioral and social sciences research.

### **Title: Using Data Science to Leverage Social Media and Health Services Data and Improve Access to Evidence-Based Opioid Treatment**

Agency: National Institute of Health - NIDA

Role: Co-Investigator (with Daniel L. Howard; Yinfei Kong)

Amount Requested: \$2.5 million

Summary: The effects of the opioid epidemic in the United States have caused an unparalleled rise in mortality and negative health outcomes, especially for women and ethno-racial minority populations, compared to white males. The proposed study will utilize innovative big data science to synchronize a multi-year and nationwide social media and pre-existing health services data to advance novel approaches to improve access to evidence-based opioid treatment. Using natural language processing, we will extract longitudinal data from Twitter posts and Youtube comments across different communities nationwide, that capture community sentiment regarding OUD treatment. We will then use novel techniques to harmonize social media and treatment programs survey data across several years. This project aims to expand the addiction health services field's current methodologies, to inform policies and interventions that are established on a deeper understanding of the social, technical, and cultural factors that may improve access to care.

Date: 09/01/24-08/31/29

### **Current Research Support**

#### **Title: Promoting Decent Work and Meaningful Work for Low-Wage Workers in Primary Health Care**

NYU Discovery Research Fund for Human Health

Role: Principal Investigator (with Alden Lai)

Amount Awarded: \$19,150

Summary: This project seeks to build a program of research centered on promoting job quality and improving work environments of low-wage workers in primary health care (e.g., medical assistants and office staff). Experts consider these workers as indispensable members of the primary care workforce. However, these workers have historically received minimal attention in research, practice, and policy, in comparison to other cadres of health workers (e.g., physicians, nurses). This project proposes to conduct information gathering with Key Opinion Leaders in the primary care sector, focusing on low-wage workers. We expect this research to contribute to the intersection of several research topics, including human resource management, equity at work, and service delivery/quality in primary health care.

Date: 09/01/23-08/31/25

#### **Title: From Workforce Diversity to Key Cultural Competency Strategies to End Racial Disparities in Opioid Treatment Outcomes Across the Nation**

R01 MD014639-01A1- National Institutes of Health, National Institute on Minority Health and Health Disparities

Role: Consultant (PI: Daniel L. Howard; Erick G. Guerrero)

Amount Awarded: \$3.16 million

## JEMIMA A. FRIMPONG

Summary: this study seeks to determine the role of culturally competent strategies, and in particular workforce diversity, to improve treatment access, engagement, and medication-assisted treatment (MAT) maintenance dosage, i.e., methadone, buprenorphine and naltrexone for African- American and Hispanic populations in opioid treatment programs (OTP) nationwide. The study will rely on the National Drug Abuse Treatment System Survey (NDATSS), which is a unique, nationally representative longitudinal data (2005-2017); the study also will collect two waves of new data in 2021 and 2023 to assess the effect of culturally and linguistically appropriate services (CLAS) on OTP process measures [wait time, retention, and adequate MAT dosages). The study seeks to improve measurement of cultural competence using a gold standard instrument - the Cultural Competency Organizational Assessment (COA360 [CLAS]) and assess its predictive validity on process measures in 2021 and 2023. Findings will inform treatment programs' use of cultural competence strategies to improve OTP wait time, retention and adequate dosage, and with these efforts reduce racial/ethnic disparities in opioid use disorder treatment. Policy-makers will be able to make decisions about how to allocate scarce resources needed to address the opioid epidemic.

Dates: 12/1/2020 - 11/30/2025

### **Title: A Cluster Randomized Controlled Trial to Increase HIV Testing in Substance Use Treatment Programs**

R01 DA043130 NIH – NIDA

Role: Principal Investigator (with Lisa Metsch; Daniel Feaster)

Amount Awarded: \$8.5 million

Summary: We propose to develop and test two active evidence-based “practice coaching” (PC) interventions, in a 3-arm cluster-RCT of 51 OTPs, to improve the provision and sustained implementation of 1) HIV testing and linkage to care and 2) joint HIV/HCV testing and linkage to care among OTP patients. In PC, change agents and key OTP staff are provided training and support to facilitate the implementation of innovation and sustain resulting improvements. Specific aims are: Aim 1: To evaluate the effectiveness of the PC interventions on improving patient uptake of HIV testing in OTPs including the incremental impact of the HIV/HCV intervention on HIV testing. Aim 2: To examine, using mixed-methods, the impact of the PC interventions on the provision and sustainability of HIV testing and timely linkage to care. Aim 3: To evaluate 1) the cost-effectiveness of the PC interventions compared incrementally to one another and to the control condition, and 2) the budget required to scale up the PC interventions nationally. This will be the first study to test organizational approaches to increase HIV and HIV/HCV testing and linkage to care in OTPs.

Dates: 09/01/16-08/31/25

### **Completed Research Support**

#### **Title: Disclosure of Sensitive Information in Organizational Settings and Health-Related Outcomes: An Examination of Decision-making Processes and Social Networks**

NYU Research Catalyst Prize (RCP)

Role: Principal Investigator (with Kinga Makovi)

Amount Awarded: \$15,500

Summary: Disclosure of sensitive information could motivate support systems that may mitigate potential adverse consequences from non-disclosure (e.g., identification of resources, emotional

## JEMIMA A. FRIMPONG

support, etc.). Alternatively, disclosure of sensitive information could lead to negative consequences (e.g., retaliation, loss of opportunities). The outcome of disclosure may however vary based on multiple factors, including the manner of disclosure, antecedents of the decision to disclose, and perceived spread of information within networks. We seek to understand decision making processes underlying disclosure of sensitive information (e.g., COVID-19 infection, health status, salary) in organizational settings, and the extent to which social networks mediate/moderate the potential positive or negative consequences of disclosure. We are especially interested in understanding the decision making, disclosure, and social networks dynamics on health-related outcomes, including wellbeing, and psychological safety.

Dates: 09/01/22-10/31/23

### **Title: The Role of Entrepreneurial Environments, Individual Attributes, and Entrepreneurial Intentions**

NYUAD Faculty Research Funds

Role: Principal Investigator (with Seungah S. Lee)

Amount Awarded: \$84,600

Summary: Entrepreneurship is considered an important factor in economic growth and job creation. Universities have also been shown to have an important role within the larger entrepreneurship ecosystem, and serve as a constant source of innovation and creativity. Existing studies suggest that several factors may influence students' decision to pursue a venture or business, including internal (e.g., including perceived desirability, feasibility, and propensity to act upon opportunities) and external factors (e.g., university environment, policies). Few studies have however examined the direct and indirect relationships between the economic-social-political conditions, individual attributes, and entrepreneurial intentions. This study thus seeks to examine the relationships between policies, socioeconomic conditions, entrepreneurship education, and support (both financial and non-financial), on entrepreneurial intentions and venture creation. We will also assess key points in the education process, as well as motivating factors, that may lead to a change in student entrepreneurial intentions over time.

### **Title: Proactive Work Behaviors in Health Care: Fostering a Managerial Perspective and Directions for Future Research**

New York University (19 Washington Square North Faculty Fellowship)

Role: Principal Investigator (with Alden Lai)

Amount Awarded: \$45,000

Summary: We propose to study proactive work behavior in health care settings. Proactive behavior is defined as behavior that is self-starting, future focused, and change oriented. Employees who are proactive are more likely to be better performers, contributors, and innovators. Despite the importance and implications of proactivity in management practice, it has yet to capture the attention of scholars and practitioners in the health care field. Guided by research from psychology and management science on proactivity, we aim to better understand and identify organizational conditions that are the most suitable for proactive behaviors (vs. those that will not) in health care organizations. Findings from this research will foster a managerial perspective as well as identify a set of research directions that scholars can consider to ultimately improve the wellbeing of health care workers, and ultimately patients.

Dates: 07/01/21-07/31/22

**JEMIMA A. FRIMPONG**

**Title: Neuroscience of Decision-Making in Hiring Practices: Designing a Functional Magnetic Resonance Imaging (fMRI) Experiment**

Johns Hopkins University Catalyst Award

Role: Principal Investigator

Amount Awarded: \$75,000

Summary: I propose to explore whether insights from neuroscience may help further our understanding of the dynamics of racial/ethnic discrimination in labor markets. I will design and pilot a robust fMRI experiment, which will help identify the neural correlates of discrimination in hiring decisions. I expect that findings from this experiment will then help me 1) formulate new theories about the causal pathways leading to the emergence of discrimination in hiring decisions, and 2) devise new interventions that may help reduce the extent of discrimination in labor markets in the US.

Dates: 07/01/17-07/31/20

**Title: Economic Analysis of Rapid HIV and HCV Testing in Drug Abuse Treatment Programs**

R01 DA027379, NIH – NIDA

Role: Co-Investigator (PI: Bruce Schackman)

Amount Awarded: \$2.5 million

Summary: The study will estimate the cost-effectiveness of specific HCV linkage and care coordination initiatives in substance abuse treatment programs in the context of ACA implementation, new reimbursement policies, and organizational factors and their impact on program budgets. It will also explore the budget impact and cost-effectiveness of delivering onsite HIV and HCV testing, linkage and care coordination in syringe exchange programs (SEPs), a delivery setting where testing and linkage services have not been systematically examined. To achieve the objectives of the study, we collect preliminary data and conduct exploratory modeling studies.

Dates: 02/01/15-01/31/19

**Title: A Bundled Rapid HIV/HCV Testing Intervention to Increase Receipt of Test Results**

R34 DA038530-01, NIH – NIDA

Role: Principal Investigator

Amount Awarded: \$698,000

Summary: The study first develops a protocol for the provision of bundled rapid HIV/HCV testing in drug treatment programs. It then tests whether the bundled testing approach increases the receipt of HIV and HCV test results among patients during a randomized controlled trial (n = 190). Finally, the study assesses barriers and facilitators of the adoption, implementation, and sustainability of bundled HIV/HCV testing. These data will inform the development of a multi-level intervention designed to stimulate the adoption of bundled HIV/HCV testing in drug treatment programs.

Dates: 01/10/15-01/09/18

**Title: Development and Feasibility Testing of a Mobile Phone-Based HIV Primary Care Engagement Intervention**

Pilot funding, UCSF, Learning for Early Careers in Addiction and Diversity (LEAD) Program

Role: Principal Investigator

**JEMIMA A. FRIMPONG**

Amount Awarded: \$25,000

Summary: The proposed study will develop and test the usability of an mHealth application and text messaging system (iTakePrEP) to increase knowledge about and self-efficacy to use the iTakePrEP tool among HIV-negative persons with SUDs, including PWID. We will develop content for the mHealth system based on the scientific literature and reports from national health agencies, and adapt an existing mHealth platform to generate a prototype of the mHealth tool. We will conduct usability testing of the prototype with individuals from the target population to assess reactions to the iTakePrEP tool, including comprehension of content, learnability of behavioral skills strategies, and satisfaction. We will measure the perceived usefulness, ease of use, and self-efficacy to use iTakePrEP. We will also assess the likelihood to advise peers to use iTakePrEP. Results from the study will inform a randomized controlled trial to test the feasibility and acceptability of the iTakePrEP tool among persons with substance use disorders.

Dates: 08/16/16-04/30/17

**Title: The Impact of Organizational and Team Dynamics in Substance Abuse Treatment Programs on Performance Improvement**

K12 (CU Irving Institute for Clinical and Translational Research)

Role: Principal Investigator

Amount Awarded: \$250,000

Summary: The study examines the influence of organizational team dynamics on treatment practices and client outcomes in drug treatment programs. To achieve this objective, I conduct semi-structured qualitative interviews with 50 treatment providers in New York City programs. The interviews focus on the following aspects: organizational culture, learning and climate, as well as team effectiveness. These qualitative interviews then inform the design of a survey instrument for measuring work team dynamics and the use of evidence-based practices (e.g., methadone dosage, HIC/HCV testing) in drug treatment programs in NYC. This survey targets approximately 300 staff members and managers in 12 treatment programs.

Dates: 07/01/12 - 06/30/14

**Title: Testing a Comprehensive Model of the Diffusion of Evidence-Based Practices.**

1 R01DA030459 -03 (NIH – NIDA), Diversity Supplement

Role: Investigator [Thomas D'Aunno – Principal Investigator]

Amount Awarded: \$2.5 million

Summary: The study aims to understand factors that promote the delivery of effective services in health care organizations. Four distinct conceptual models that account for variation in the diffusion and implementation of EBPs among health care organizations are examined: (1) a socio- technical model; (2) an organizational-managerial model; (3) a market model; and (4) a state regulation model. The study empirically investigates the relative importance of these models or how they might combine to influence the diffusion of EBPs. The study examines the relationships among these models in a national study of two clinical practices among opioid treatment programs (OTPs): HIV rapid testing and the prescription of buprenorphine.

Dates: 02/01/12 - 06/30/12

**Title: Improving Maternal and Child Health: Mobile Technology for Community Health.**

Bill & Melinda Gates Foundation

Role: Co-Investigator

## JEMIMA A. FRIMPONG

Amount Awarded: \$8.3 million

Summary: The project aims to determine whether mobile phones can be an effective tool in managing healthcare data and transmitting health information to remote populations, with the ultimate goal of improving maternal and child health outcomes in rural Ghana.

Dates: 01/01/09-07/31/11

### **Title: The Impact of Competition in Hospital Markets on Disparities in Cardiovascular Procedures.**

F31 - HS16452-2 (AHRQ)

Role: Principal Investigator

Amount Awarded: \$150,000

Summary: The purpose of this individual pre-doctoral research training fellowship is to support promising students from groups that have been shown to be underrepresented and improve the diversity of the health-related research workforce.

Dates: 08/01/06-01/01/09

### **Advanced Training in Health Services Research (NRSA Institutional Training Program)**

5-T32-H000009-20 (AHRQ)

Role: Pre-Doctoral Research Fellow [Patricia Danzon – Principal Investigator]

Amount Awarded: \$200,000

Summary: The goal of this competing continuation is to provide research training in health services research for pre-doctoral trainees.

Dates: 08/30/04-07/31/06

## **AWARDS AND HONORS**

2021 - 2022	19 Washington Square North Faculty Fellow (NYU)
2020 - 2021	Social Neuroscience & Neuroeconomics Program (Duke University)
2019 - 2019	Dean's Award for Faculty Excellence (Carey Business School)
2018 - 2018	Massachusetts General Hospital /Harvard Functional MRI (fMRI) Visiting Fellowship
2014 - 2017	Learning for Early Careers in Addiction & Diversity (LEAD) Program
2014 - 2014	Atlantic Alliance for Public Health Mobility Scholarship (2014) France : École des Hautes Études en Santé Publique Spain: Andalusian School of Public Health - University of Granada (Granada)
2014 - 2014	College on Problems of Drug Dependence (CPDD) – NIDA Director's Travel Award
2008 - 2008	Academy Health - Public Health Systems Research Interest Group Student Scholarship
2008 - 2008	Poster award at 2008 Population Association of America (PAA) Annual Conference
2006 - 2009	Kirschstein National Research Service Award - Individual Grant NRSA F-31

## **JEMIMA A. FRIMPONG**

2006 - 2007	Frameworks for Global Health Fellowship - NIH-Fogarty / University of Pennsylvania
2006 - 2007	Graduate Research Fellowship - University of Arizona
2006 - 2007	Health and Society in Africa Scholar - Merck Foundation
2006 - 2007	Wharton Center for International Business Education and Research (CIBER) Award
2004 - 2008	Fontaine Pre-doctoral Fellowship -University of Pennsylvania
2004 - 2006	Pew Foundation Grant - University of Pennsylvania
2003 - 2004	Veterans Affairs Graduate Health Association Training Program (GHATP)

### **TEACHING EXPERIENCE**

#### **New York University (NYU), Abu Dhabi**

- Strategic Management (BA)
- Business Consulting Field Project (BA)
- Capstone Seminar (Management Track; BA)
- Capstone Project (Management Track; BA)

#### **Johns Hopkins University (Carey Business School)**

- Health Care Organization and Management (MS)
- Corporate Strategy (MBA)
- Health Systems Around the World (MS)

### **ACADEMIC SERVICE AND PROFESSIONAL ACTIVITIES**

## JEMIMA A. FRIMPONG

### Service to University and Division (NYUAD)

2024 – Present	NYUAD Academic Strategy: Postgraduate & Professional Programs
2023 – Present	Stern School of Business at Abu Dhabi Faculty Advisory Board
2021– 2024	Social Science Division, Executive Committee, Member
2021– 2024	Social Science Curriculum Committee, Member
2020 – 2024	Black and African Diaspora Community of Action, Leadership Committee
2021 – 2023	New York University Abu Dhabi, Promotion and Tenure Committee
2022 – 2023	NYUAD Transition Investment Lab (TIL), Steering Committee Member
2022 – 2023	Vice Provost for Undergraduate Education Search Committee, Co-Chair
2023 – 2023	Business, Organizations and Society Program Visiting Faculty Search Committee, Member
2023 – 2023	Business, Organizations and Society Program Instructor Search Committee, Chair
2021 – 2023	Business, Organizations and Society Program Tenure Track Faculty Search Committee, Chair
2021 – 2023	Business, Organizations and Society Program Visiting Faculty Search Committee, Chair
2020 – 2022	Social Science Division Post-Doctoral Search Committee, Member
2020 – 2022	MPH Program Development, Co-Lead
2020 – 2022	New York University Abu Dhabi Academic Strategy Task Force, Executive Committee/Co-Chair for Research / Member of Graduate and Postdoctoral Working Group
2021 – 2022	Reviewer for Office of Inclusion and Equity Postgraduate Research Fellowship
2020 – 2021	Social Research and Public Policy (SRPP) Gender in the MENASA Faculty Hiring Committee, Co-Chair

### Service to University and School (Johns Hopkins University; Columbia University)

2018 - 2020	Course Lead, Johns Hopkins Carey Business School, Health Care Organization and Management
2016 - 2020	Course Lead, Johns Hopkins Carey Business School, Fundamentals of Health Care Systems
2018 - 2020	Johns Hopkins Carey Business School Representative, JHU Social Network Analysis (SNA) Group
2016 - 2017	Course Lead, Johns Hopkins Carey Business School, Corporate Strategy
2018 - 2019	Johns Hopkins Carey Business School, Student Orientation Workgroup
2018 - 2019	Johns Hopkins University, Health, Technology, Innovation MBA Committee
2012 - 2016	MPH Thesis Advisor, Department of Health Policy and Management, Mailman School of Public Health, Columbia University Department
2012 – 2016	MPH Student Advisor, Department of Health Policy and Management,

## JEMIMA A. FRIMPONG

2012 – 2016	Mailman School of Public Health, Columbia University Member, Admissions Committee, Department of Health Policy and Management, Mailman School of Public Health, Columbia University
2014 - 2014	Member, Faculty Advisory Committee for search of Chair of Biostatistics
2013 - 2014	Faculty Advisor, Mailman School / Columbia Business School Healthcare Case Competition
2013 - 2014	Faculty Sponsor, Columbia University Undergraduate Scholars Program, Columbia University
2012 - 2013	Facilitator, Diversity at Mailman: Self, Social and Global Awareness (SSGA) training, Mailman School of Public Health, Columbia University

### Editorial Board Member

2015 - Present	Medical Care Research and Review
2016 - 2022	Journal of Psychoactive Drugs
2015 - 2020	BMC Health Services Research

### Advisory Board / Committees

2024 – 2025	Nominations and Awards Committee Chair, Organizational Neuroscience (NEU) Interest Group Academy of Management Annual Meeting
2023 – 2024	Interest Group Chair, Organizational Neuroscience (NEU) Interest Group Academy of Management Annual Meeting
2023 – 2023	Addiction Health Services Research (AHSR) Conference Abstract Reviewer
2019 - Present	Bill and Melinda Gates Institute for Population and Reproductive Health (JHU), The Challenge Initiative (TCI) Beyond Imagination Advisory Group
2019 - Present	Science of Diversity and Inclusion (SODI) Initiative (University of Chicago)
2023 – 2023	Addiction Health Services Research (AHSR) Conference Early Career Awards Committee
2022 – 2023	Steering Committee Member, Academy of Management Conference in Organizational Neuroscience
2019 – 2022	Executive Committee of the Academy of Management Organizational Neuroscience (NEU) Interest Group, Representative at Large
2019 – 2022	Education and Professional Development Committee of the Academy of Management Organizational Neuroscience (NEU) Interest Group, Member
2014 – 2020.	National Institute of Drug Abuse, Clinical Trial Network HIV Interest Group
2014 - 2020	National Institute of Drug Abuse, Clinical Trial Network Minority Interest Group (MIG)
2017 – 2020	Johns Hopkins University, Urban Health Institute (UHI) Steering Committee
2016 – 2020	Johns Hopkins University, Alliance for Healthier World, Steering Committee

## JEMIMA A. FRIMPONG

2014 – 2020	Institutional Review Board (START Treatment and Recovery Centers)
2011 – 2017	Academy of Health Health Information Technology Interest Group (IG)
2013 – 2016	Academy of Health Quality and Value Interest Group (IG)

### Professional Service

2022 – 2023	Grant Reviewer, Center for Health Economics of Treatment Interventions for Substance Use Disorders, HCV, and HIV (CHERISH)
2019 – 2019	Facilitator, Health Care Management Emerging Scholars Consortium Academy of Management, 2019
2019 – 2019	Presenter, Hopkins on the Hill (Capitol Hill), 2019
2019 – 2019	Moderator, Professional Development Workshop, “Successful Academic Careers in Health Care Management: A Moderated Panel of Senior Scholars”, Academy of Management

### Professional Association Memberships

2016 – Present	Organizational Theory in Health Care (OTHC)
2012 - Present	Health Systems Global
2011 - Present	The College on Problem of Drug Dependence (CPDD)
2004 - Present	Academy of Health
2004 - Present	Academy of Management (AOM)
2001 - Present	American Public Health Association (APHA)

### Referee

American Journal of Public Health, Journal of Substance Abuse Treatment, Health Services Research, Health Affairs, Health Care Management Review, Medical Care Research and Review, Medical Care, Health Policy and Planning, BMC Health Services Research, Addiction

### PRESENTATIONS/INVITED TALKS

- 2024 Lai A., Wee, K., **Jemima A. Frimpong**. What Makes Proactive Behaviors at Work Effective? Perspective of Healthcare Executives. (Academy of Management, Abstract accepted, Oral Presentation)
- Sweida-Metwally S., Makovi K., Shepherd H., **Jemima A. Frimpong**. How Workplace Information Transmission Shapes Bullying Disclosure. (American Sociological Association, Abstract submitted)

- D'Aunno T.A., **Frimpong J.A.**, Kong, Y., Guerrero, E. Khachikian T., Wang., S., Howard, D.L. Variation in Quality of Buprenorphine for Opioid Treatment: Designed to Fail? A Dose Problem? (Academy of Management, Abstract submitted)
- 2023 Predicting and Responding to Change: Environmental Uncertainty among Addiction Treatment Providers. (Academy of Management, Boston, MA ) (Invited, Oral Presentation)
- External and Internal Factors Associated with Treatment Retention and Completion in Addiction Health Services in the United States. (Addiction Health Services Research, New York, New York ) (Invited, Oral Presentation)
- 2022 Making the Most of Proactive Behaviors in Health Care: From Research to Practice. (19 Washington Square Fellowship Panel, New York, New York ) (Invited, Oral Presentation)
- 2021 Food for Thought in Faculty Advancement: Pay it Forward: Trainee Centered Mentoring of Graduate Students and Postdocs (NYUAD) (Invited, Oral Presentation)
- 2020 Panel on Interdisciplinarity (NYUAD) (Invited, Oral Presentation)
- 2019 Development and Usability Testing of a Mobile Phone Based Intervention to Increase Knowledge and Uptake of PrEP Among Persons with Substance Use Disorders (Society for Prevention Research, San Francisco, CA) (Accepted, Oral Presentation)
- Moderator, Health Organizational Design Conference – Where Operations Management Meets Organizational Theory (Carey Business School)
- 2018 Challenges and successes in providing on-site HIV and HCV testing in substance use disorder treatment programs (Addiction Health Services Research, Savannah, Georgia) (Accepted, Oral Presentation)
- Effects of On-site Bundled Rapid HIV/HCV Testing on Receipt of Test Results among People in Outpatient Substance Use Treatment: A Randomized Clinical Trial (22<sup>nd</sup> International AIDS Conference, Amsterdam, the Netherlands) (Accepted, Poster Presentation)
- Discussant, Organizational Theory in Health Care Conference (Carey Business School)
- 2016 Adoption and Implementation of HCV Testing in Addiction Health Services (Brown University, Providence, Rhode Island) (Invited, Oral presentation)
- Adoption and Implementation of Evidence-Based Practices in Health Care Organizations (Johns Hopkins University - Carey Business School, Baltimore, MD) (Invited, Oral presentation)

**JEMIMA A. FRIMPONG**

- Adoption and Implementation of HIV and HCV Testing Services in Opioid Treatment Programs (University of Michigan, Ann Harbor, Michigan) (Invited, Oral presentation)
- 2015 Substance Use Disorders Treatment History Among Hospitalized HIV-Infected Substance Users in 11 U.S. Cities (College of Problems on Drug Dependence (CPDD), Phoenix, Arizona) (Accepted, Oral presentation)
- 2014 The Impact of HIV Testing Policies on Hepatitis C Testing Practices (College of Problems on Drug Dependence (CPDD), San Diego, California) (Accepted, Oral presentation)
- Hepatitis C Testing in Substance Abuse Treatment Programs (Johns Hopkins Bloomberg School of Public Health, Baltimore, MD) (Invited, Oral presentation)
- 2013 Managers matter: understanding HCV testing practices in substance abuse treatment programs (National Institute of Drug Abuse (NIDA) Clinical Trials Network Annual Meeting, Bethesda, Maryland) (Accepted, Oral presentation)
- 2012 Organizational Determinants of HCV Testing in Opioid Treatment Programs (Columbia University, New York, New York) (Invited, Oral presentation)
- Reducing the Burden of Hepatitis C in the US: Analyzing the Role of Opioid Treatment Programs (Addiction Health Services Research Conference, Boston, Massachusetts) (Accepted, Poster presentation)
- Missed opportunities for hepatitis-C testing: Results from a national study (NIDA Diversity Supplement Workshop, Gaithersburg, Maryland) (Accepted, Poster presentation)
- The impact of competition in hospital markets on disparities: the case of coronary artery by-pass graft (NHLBI – Program to Increase Diversity among Individuals Engaged in Health –Related Research (PRIDE) Annual Meeting, New York, New York) (Invited, Oral presentation)
- Does supervision improve health worker productivity? Evidence from the Upper East Region of Ghana (Tulane University, School of Public Health and Tropical Medicine, New Orleans, Louisiana) (Invited, Oral presentation)
- 2010 Fueling Implementation Science: Measuring Local Processes in Ghana (Presented at Global Health Symposium on Health Systems Research, Beijing, China) (Accepted, Oral presentation)
- The role of local health systems in service delivery and scale-up of health services (Presented at Global Health Council, Washington, DC). (Invited, Poster presentation)

## **JEMIMA A. FRIMPONG**

- 2008 Does Economic Growth Improve Child Health? Understanding Discordant Trends in Malnutrition Indicators during the Economic Growth in Ghana (Best poster award at Population Association of America Annual Conference, New Orleans, Louisiana) (Accepted, Poster presentation)
- The Impact of Competition in Hospital Markets on Racial/Ethnic Disparities in Patient Outcomes (Public Health Systems Research Interest Group Award at Academy of Health Annual Conference, Washington, DC) (Accepted, Poster presentation)
- Economic Growth in Ghana and the Effects of Mother's Sector of Employment on Trends in Childhood Malnutrition. (Presented at Population Association of America Annual Conference, New Orleans, Louisiana) (Accepted, Oral presentation)
- 2005 Effects of Maternal and Provider Characteristics on Up-to-Date Immunization Status of Children Aged 19 - 35 Months. (Presented at 2005 American Public Health Association Annual Conference, Philadelphia, PA) (Accepted, Poster presentation)
- 2004 Veterans Affairs Network 8: The Effect of the Patient Intake Process on the Revenue Cycle. (Presented at 2004 American College of Healthcare Executives Annual Meeting 2004, Washington, DC) (Invited, Oral presentation)
- 2003 Vaccination Coverage among Kindergarten Children in Phoenix. (University of Arizona Graduate Student Research Symposium 2003, Phoenix, Arizona) (Invited, Oral presentation)

## **INDUSTRY EXPERIENCE**

### **Unlock Her Future Prize, London, UK**

2023 – 2023, Academic Partner

Serve as lead and support NYUAD's partnership with the Unlock Her Future Prize, by the Bicester Collection. The mission of the prizes is to find aspiring women entrepreneurs and help them launch their social impact start-ups.

### **United Health Group, Phoenix, AZ**

2002 – 2003, Research Analyst

Worked as part of a team to develop strategies and recommendations for assessing business

needs, interpreting data, and identifying opportunities for growth, resulting in multi-million-dollar contracts to manage Medicaid and Medicare programs for the U.S. Department of Health and Human Services.

### **Department of Veterans Affairs, VA Sunshine Healthcare Network-VISN 8, Bay Pines, FL**

2003 – 2004, Systems Analyst

Applied quality management, risk management, cost/benefit, and utilization review methods to determine feasibility of capital investments on organizational performance. Recommendations

**JEMIMA A. FRIMPONG**

were implemented across the entire health care network.
